

DevOps Engineer Cover Letter

Dear Sir/Madam,

I am writing to express my interest in the DevOps Engineer position at UbuntuNet Alliance. As a highly motivated and experienced PHP developer with a passion for automation and innovation, I believe that I would be a valuable addition to your team.

With 2 years of experience in the field, I have honed my skills in designing, deploying, and maintaining complex IT infrastructure systems. I have extensive knowledge of cloud technologies, including AWS, Azure, and Google Cloud, and have experience working with containerization technologies, such as Docker and Kubernetes.

One of my areas of expertise is CI/CD pipelines, and I have extensive knowledge of tools such as Jenkins and Travis CI. I have a strong understanding of how to automate the build, testing, and deployment phases, resulting in faster time to market and reduced downtime for critical systems.

I have hands-on experience with PHP and scripting languages, such as Bash and Perl, and I am well-versed in configuration management tools, such as Ansible and Puppet. Additionally, I have experience with monitoring and logging tools, such as Nagios, Zabbix, and ELK, to ensure that systems are always running at optimal performance.

I am confident that my technical skills and experience, combined with my passion for automation and my strong communication skills, make me an excellent fit for this position. I am eager to bring my expertise to your team and help drive the success of your projects.

Thank you for considering my application. I would welcome the opportunity to further discuss my qualifications and experience with you and to learn more about the exciting opportunities at UbuntuNet Alliance.

I look forward to hearing from you soon.

Sincerely,

Wilson Soza

CURRICULUM VITAE FOR WILSON SOZA
